

**NEW!**

# 6" Zirconia Alumina Type 29 Conical PowerFlex Flap Discs with Fiberglass Backing

## Grind and Finish in One Operation Increase Productivity; Decrease Costs

Maximum stock removal. Consistent finishes on steels, metals and alloys. The Type 29 angled, conical shape, used at a 15° angle, provides fuller surface contact for faster, higher stock removal rates.

### Features

- New 6" size
- Sharp, free-cutting zirconia aluminum grain
- Fiberglass back

### Benefits

- For the growing popularity of 6" lighter weight power tools
- Best "all-around" product
- Less pressure for aggressive cut and longer life

*Safe, Quiet & Easy to Control  
for Rapid Stock Removal,  
Consistent Finishes &  
Longer Life*

## Case History

**Workpiece:** Stainless steel cabinets for the medical industry

**Application:** Break down welds, while leaving a good finish on the cabinets

**Objective:** Do the same job, faster and with less downtime

**Current Products:** 7" zirconia resin fiber discs – 60 grit for weld removal; 80 grit for final finishing

**Performance Results:** 5 – 7 fiber discs used per cabinet

**Merit Product:** 6" zirconia Type 29 PowerFlex flap disc – 40 grit

**Results:** Customer was able to complete the grinding of the welds and leave a fine finish with the same flap disc, in one operation. The 6" was on a lighter weight tool and allowed the operator more flexibility.
